

# Why You Should Become a Statistic:

## Heart Disease Takes One American Life Every Minute

- Heart disease kills more than 725,192 people each year.
- Heart disease has been the No. 1 killer in the U.S. for the past 83 years straight.
- Heart disease isn't always picky about who it takes.

You can beat the numbers by becoming a number yourself. Cardiac scoring at Decatur Health Imaging is a fast, affordable and non-invasive test that measures the amount of calcium in the arteries and converts that information into a score.

- Decatur Health Imaging offers the latest technology and a brand new scanner for cardiac scoring.
- Test time: approximately five minutes.
- The test procedure is safe and comfortable.
- Results are read by a board-certified radiologist and cardiologist.

The value of this fast, easy, affordable test can be measured in the years it adds to your life. Start keeping score today.
